Fostering Future Change-Makers: Jiva Public School's Holistic Approach to Education

Question 1. Teaching isn't just a job, it is a voluntary pledge to make the world a better place. Please share with us your views on being an educator, the real change makers of the future of the country.

Answer: Every child is born with a unique and inherent potential which can be unlocked by nurturing the Swabhaav and true nature. Jiva Public School uses indigenous principles of learning through the Jiva Growth Compass, which is a unique educational framework that helps children discover their unique 'prakriti and swabhaav' [identity and nature] to bring an internal transformation. The growth compass is a combination of four competencies or strengths that help children develop the capability to overcome any challenge that might come their way to turn this world into a better place. The four competencies develop integrated life-skills among children by providing various tools such as Multiple Intelligences and Multiple Nature. Practice of Swadhyay enables them to distinguish right from wrong, focus on goals, develops ability to prioritize and decision making, self, other, environment fosters

empathy for others and environment, they appreciate interconnections, collaborate and resolve conflicts. These tools empower children to master their growth paths focusing on core values and life skills and nurture the change makers of tomorrow that the world needs to face new challenges with confidence and conviction.
